NAVIGATING SUCCESS TOGETHER

Admiral Consulting Group at Community Summit 2026

October 11th - 15th, 2026 • Gaylord Opryland Resort & Convention Center • Nashville, TN

Admiral Consulting Group will be at Community Summit 2026 in Nashville this October. We're looking forward to catching up with members of the Dynamics community and meeting with businesses exploring Business Central, ERP transformation, and smarter ways to scale operations.

If you'll be attending, we'd be happy to connect. Reach out to schedule time with the Admiral team while we're in Nashville.

A Path to Reconciliation

From automatic matching to AI-powered suggestions, Business Central helps you reconcile faster and close with confidence.

Business Central helps you move through reconciliation with automatic matching, intelligent Copilot suggestions, and flexible manual controls all designed to make month-end a little easier.

Not every bank transaction is easy to reconcile. Some match instantly, while others require a little investigation. Business Central gives you the tools to handle both without slowing down your close.

- **Match Automatically:** Let Business Central handle routine matches using built-in text, amount, and date logic, such as matching a check number to the Document No.
- **Reconcile with Copilot:** When transaction descriptions don't line up neatly, Copilot can suggest intelligent matches, helping you resolve exceptions with less manual effort.
- **Match Manually:** For transactions that need a closer look, manual matching gives you full control, including support for both 1:1 and 1 matching.

No matter which approach you use, the goal is the same: spend less time sorting through mismatches and more time moving your books toward a timely, accurate close.

The payoff: faster month end closes, fewer reconciliation errors, and less time tracking down mismatches, all built right into Business Central.

The Future of Fulfillment: AI, Automation & Real-Time Visibility

Explore smarter warehouse strategies that reduce manual work, improve accuracy, and drive higher ROI.

On the latest episode of the Admiral Navigator Podcast, explore how modern businesses are transforming warehouse operations with Microsoft Dynamics 365 Business Central, AI, and automation reducing errors, improving inventory visibility, accelerating fulfillment, and enabling smarter decisions.

In This Episode

- Move beyond spreadsheets and manual work
- Uncover the hidden costs of poor inventory visibility
- Accelerate fulfillment and ROI with automation
- See where AI and Copilot make an impact
- Build for growth with Business Central

Considering a move to Business Central?

Know where you stand before you make the move.

Simplify Payments with iPayment Solutions

Connect your payments to the system that runs your business.

iPayment Solutions helps businesses streamline payment processing directly within Microsoft Dynamics 365 Business Central, reducing manual steps and keeping payment information connected to your financial operations.

- Integrated payments: Process and manage payments within Business Central without switching between multiple systems.
- Greater efficiency: Reduce manual data entry, improve accuracy, and make reconciliation easier.
- Expert guidance from Admiral Consulting: Our team can help you evaluate, implement, and optimize iPayment Solutions to fit your business processes and maximize the value of Business Central.

Looking to simplify your payment process? Admiral Consulting can help you get more from Business Central with iPayment Solutions.

Employee Spotlight: Cory Rider

Account Executive

Cory Rider joined Admiral in July as an Account Executive, bringing experience in technical staffing, manufacturing, entrepreneurship, product design, and digital transformation. He helps organizations evaluate and adopt Microsoft solutions, including Dynamics 365 Business Central, CRM, Microsoft 365, Power Platform, Azure, Fabric, and Copilot.

In 2012, Cory founded C-RIDE Board Shop, where he gained firsthand experience with manufacturing, supplier management, disconnected data, and financial visibility. After selling the business, these experiences led him into technology consulting. He has earned Microsoft certifications in Microsoft 365, Dynamics 365, and Power Platform and is working toward his Business Central Functional Consultant certification.

Outside of work, Cory enjoys paddleboarding, camping, 3D printing, woodworking, reggae music, Mizzou sports, pickleball, dogs, and golf.

Microsoft Fun Fact

Microsoft's first product was created on a computer they didn't even have.

In 1975, Bill Gates and Paul Allen developed Altair BASIC for the Altair 8800 but they didn't own an Altair to test it on. They built a simulator on another computer, then successfully demonstrated the software to MITS, the Altair's manufacturer.

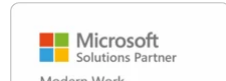

That demo became Microsoft's first major deal and the beginning of something much bigger.

Thank you for **anchoring with Admiral!**
