The Masthead Post

NAVIGATING SUCCESS TOGETHER

Which Add-Ons Can Help You Get More from Dynamics?

Admiral's most-used add-ons by industry help clients streamline operations, automate finance, and improve reporting and business planning.

Distribution & Manufacturing

Insight Works improves inventory accuracy, streamline warehouse and distribution operations, and optimize production workflows for greater efficiency and visibility across your supply chain.

Finance & AP Automation

Truvio simplifies accounts payable by automating invoice workflows, minimizing manual tasks, and helping your finance team process invoices faster and more accurately.

Financial Planning & Analysis

Prophix helps FP&A teams simplify budgeting, strengthen forecasting, and model business scenarios for better financial visibility and more informed decisions.

Financial Planning & Analysis

Vena improves financial planning, strengthens forecasting, and enhances collaboration to give FP&A team's greater visibility into business performance.

Cloud - Based Reporting

COSMO brings your reporting into focus with customizable reports and dashboards that make it easier to monitor key metrics, spot trends, and share the information your team needs.

Business Intelligence

Data Courage explores how data, business intelligence, and AI drive innovation, uncover insights, and create smarter business outcomes.

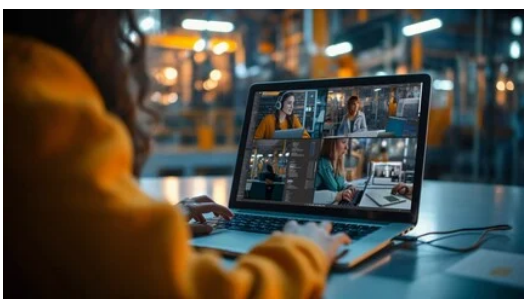

Find the Best Solutions for Your Business

Ready to Modernize Manufacturing Finance

Live Webinar | Wednesday, October 28 | 11:00–11:45 AM EDT
