

# ACTIVECONNECT

DATE ENTRY VIA EXCEL

ULTRA FAST

EASY SETUP

## Benefits

### Be Fast

ActiveConnect is built on Microsoft's blazing fast eConnect/XML technology.

You can literally import thousands of records in a matter of seconds, not hours. Move from Integration Manager and move from integrations that take hours to integrations that take merely a few minutes.

### Realize Quick ROI

Installation and setup takes just minutes. Your productivity is enhanced immediately. Ongoing maintenance is minimal.

Current eConnect users can immediately eliminate their dependence on programmers for making changes to eConnect integrations.

For companies that have simple or complex data integration needs, our Dynamics GP integration tool—ActiveConnect—is the solution. Integrate data from your website or other line-of-business applications up to 20 times faster than Dynamics GP Integration Manager. Want to use Excel™ for Journal Transactions, as many companies do, no problem. Our Dynamics GP integration tool allows push-button integration of entries from Microsoft Excel™ directly to Dynamics GP, in just seconds. Easier, Faster, More flexible, Less cost.

"Now we can gradually migrate away from our Excel tools."

ActiveConnect works with Microsoft Excel™ and other VBA-enabled productivity applications. This means you can send data directly from Excel™ to Dynamics GP. Send 100-line GL Journal transactions, customer master records, inventory items, etc. to Dynamics with a click of a button. No more manually keying line-after-line of data into Dynamics.

"I built an integration to Excel in minutes... without our IT staff."

Employing ActiveConnect may reduce the number of full GP licenses you need, as Excel™ can be used in lieu of standard Dynamics GP data entry windows—like the GL Journal Transaction window—thereby reducing your licensing needs. Further, ActiveConnect's Excel integration tool is *less than one-third the cost* of the competition.

BatchID	Reference	TransDate	TransType	Reversing Date	Post
1	PAYROLL	Weekly Payroll Batch	1/15/2014	0	
4	Account	LineDescription	Debit	Credit	
5	000-2200-00	Healthcare Withholding	\$ -	\$ 1,500.00	
6	100-5100-00	Salaries-PSO	10,000.00	-	
7	300-5100-00	Salaries-Erec	3,000.00	-	
8	400-5100-00	Salaries-Sales	3,000.00	-	
9	000-5170-00	Tax-SS	372.00	-	
10	000-5170-00	Tax-Medicare	87.00	-	
11	300-5180-00	Tax-FUTA	-	-	
12	999-9999-99	Payroll Clearing-Net Pay	-	13,000.00	
13	999-9999-99	Payroll Clearing-Tax Liabilities	-	1,959.00	
			\$16,459.00	\$16,459.00	

**Dynamics GP Customers who used to Use Microsoft Excel for Everything Now Have the Tools to Make Everything Work Together**

**Features****ActiveConnect**

<b>Fast</b>	Integrations are up to 20 times faster than Integration Manager.
<b>Cost Effective</b>	The ActiveConnect Excel integration component is less than one-third the cost of the competition. Only license the integrations you need. For example, if you only need integrate Sales Orders from your web site, there is no need to license other integrations.
<b>No GP License Needed</b>	Users do not need to be logged into GP to create or run integrations. No GP full user license is ever consumed by ActiveConnect.
<b>Drag-and-Drop</b>	Define connections to data sources easily using our drag-and-drop Active Query Builder.
<b>Flexible Security</b>	ActiveConnect uses Dynamics security (e.g., access via Dynamics user name and password), Windows security and/or SQL Server security. Use the authentication method that works best in your environment.
<b>Schedulable</b>	Easily scheduling integrations using the ActiveConnect scheduling component and the Windows scheduler or SQL Server scheduler.
<b>Override Capable</b>	While the target company (and target server) is part of the integration definition, the target company (and server) can be overridden at runtime in Excel or via the scheduler. A single integration can be used for multiple target companies.
<b>Launcher</b>	The ActiveConnect Launcher provides users the ability to run integrations without allowing them to modify them.
<b>Reusable Data Sources</b>	A single data source can be used for any number of integrations, reducing maintenance and the number of data sources that need to be defined.
<b>Sharable Integrations</b>	Integrations can be stored in any SQL Server database including the DYNAMICS system database. This allows you to easily share integrations among all your processing companies. There is no need to import and export integrations to share them.
<b>SQL Client-Enabled</b>	In addition to supporting all ODBC data sources, ActiveConnect also supports SQL Client direct connection to SQL Server data, which is faster and more reliable than ODBC.
<b>Logging</b>	All integration activities are fully logged, and the logs are viewable within Excel, ActiveConnect, and the ActiveConnect Launcher.
<b>Ready to Use in Hours</b>	Use our Windows installation wizard and you'll be up and running in minutes.

**Increase Your Dynamics GP ROI. Reduce Your Dependence on Full Client Licenses and use Excel to Enter Data into Dynamics GP.**
